BAY

PICTURE WINDOW
COMBINATIONS

The Series 200 is skillfully engineered and elegantly designed with thermally fused rigid vinyl extrusions. This made to order window offers many advantages for new construction, replacement or mobile home installations.

STYLES

FEATURES

- BEAUTIFUL BEVELED MASTER FRAME is 2-3/4" thick.
- FUSION WELDED FRAMES add strength while the sealed corners prevent air and water infiltration.
- SASH INTERLOCKS AT MEETING RAIL and TILTS IN for safe easy cleaning from inside the home.
- FULL 3/4" DOUBLE GLAZING insulates and reduces outside noise pollution.
- HEAVY DUTY DOUBLE WEATHERSTRIPPING stops drafts and saves energy.
- OPTIONAL PRE-PUNCHED NAILING FIN AROUND FRAME for ease of installation is standard.
- INTEGRATED COLOR CHOICE: White, tan and architectural bronze.
- OPTIONAL DECORATIVE GRILLS AVAILABLE BETWEEN GLASS: brass muntins, or V-grooved adds your individual style.
- SuperSpacer™, a warm-edge technology that reduces condensation, is a standard feature.
- TESTED and PROVEN BY INDEPENDENT LABORATORIES to meet or exceed the highest standards for "U" Value and CRF Rating set by ANSI/AAMA.

INSTALLATION ADVANTAGE

The thermally fused frames assure structural integrity. The units are made to order with optional integral nailing fin for best fit and installation.

INSULATION ADVANTAGES

The Series 200 window is designed to provide high resistance to heat loss or gain throughout the year.

The fusion welded multi-chambered extrusions and double glazing trap "still air" adding to the windows insulating features. Vinyl is a natural insulating material which does not conduct heat and cold as metal does. In fact, tests have proven that vinyl insulates 1400 times better than aluminum. Vinyl has insulating qualities comparable to wood yet none of its disadvantages such as rotting, cracking and the constant need for painting and expensive maintenance. The positive interlocking meeting rail with double fin seal weatherstripping stops air and water penetration.

LOW MAINTENANCE ADVANTAGE

There's virtually no maintenance. Vinyl requires no painting, and will not rust, rot, peel or corrode. The colors are totally integrated throughout the rigid vinyl and the lower sash tilts in for safe easy cleaning from inside.

THE NOISE ADVANTAGE

Vinyl windows dramatically reduce outside noise pollution that enters your home. Vinyl's unique characteristics, trapped air space and

tight sealing design combine to make a better sound barrier.

THE BEAUTY ADVANTAGE

The window features attractive beveled faced frames. Neat mitre cut corners on both frame and sash eliminates open seams found on many vinyl and metal windows which are prone to leakage. The screens are made from charcoal aluminum screen wire rolled into extruded aluminum frames for a lifetime of use and abuse. The sash lift handle is an integral part of the sash, not a screw-on accessory. The Series 200 offers you the best combination of better insulation, durability and attractive appearance.

LIMITED LIFETIME WARRANTY

**Two Year
FREE Service**

Polar Seal Window Corporation warrants to the original purchaser of Polar Seal windows that there will be no charge for any necessary repairs, parts, labor or material for as long as you own them.
